Preliminary programme

9:30 Welcome with coffee/tea

Day chair: Harm Albert Zanting (Arcadis)

10.00 Opening – Suzanne Hulscher

10.05 Roadmap of the day – Ralph Schielen & Denie Augustijn

10.15 Keynote – Richard Jorissen (Rijkswaterstaat)

The day is organized in sessions around four themes. Each session consists of pitches by the researchers, a synthesis by a project leader and an interactive panel discussion led by the day chair. During the panel discussions the day chair will seek interaction with the audience in various ways.

10.40 Theme 1: lessons from interventions

Insights in morphological and ecological effects of longitudinal training dams ([Project A](#)), development of side channels and erosion of river banks ([Project B](#)) as well as the developments in morphodynamic modelling ([Project D](#)).

11.40 Break

12.00 Theme 2: lessons from regional water systems

Insights in lateral migration of streams, interaction of streams and rivers, backwater effects upstream of wood and bends and the effects on groundwater ([Project C](#)).

12.45 Lunch + posters

14.00 Theme 3: Ecosystem services and river governance

Insights in spatiotemporal development of vegetation in floodplains, quantification of ecosystem services and methods to monitor floodplains ([Project E](#)). Moreover, this theme

includes insights from river governance ([Project F](#)) about uncertainty estimation, measuring landscape value, collaborative interactions in Dutch floodplain maintenance.

15.00 Break

15.30 Theme 4: Applications and communication

Tools to support discussions at the science-practice interface ([Project G](#)) and to evaluate river interventions in the Netherlands and abroad ([Project H](#)).

16.30 Closure – Suzanne Hulscher

17.00 Drinks
